

NOTE: The examiner must now ask the candidate,

Emergency Medical Technician Psychomotor Examination BVM VENTILATION OF AN APNEIC ADULT PATIENT

17

Candidate:	Exam	iner:	EMT EMT
Date:	_ Start Time:	End Time:	
			<u> </u>
	opriate body substa	ance isolation precautions	1
Checks responsiveness	NOTE: After checking	g responsiveness and breathing for seconds,	1
Checks breathing	[at least 5 but no mo	ore than 10] examiner informs the candidate,	1
	"The patient is unres		
Requests additional EMS	1		
Checks pulse for at least	1		
NOTE: The examiner mus	st now inform the d	candidate,	
"You palpate	a weak carotid pu	lse at a rate of 60."	
Opens airway properly			1
NOTE: The examiner mus	st now inform the d	candidate,	
"The mouth i	s full of secretions	and vomitus."	
Prepares rigid suction ca	theter		1
Turns on power to suction device or retrieves manual suction device			1
Inserts rigid suction cath	eter without apply	ing suction	1
Suctions the mouth and	oropharynx		1
NOTE: The examiner mus	st now inform the o	candidate, "The mouth and oropharynx are	e clear."
Opens the airway manually			1
Inserts oropharyngeal airway			1
NOTE: The examiner mus	st now inform the o	candidate,	
"No gag refl	ex is present and the	ne patient accepts the airway adjunct."	
**Ventilates the patient	t immediately usin	g a BVM device unattached to oxygen	
		entilate initially with BVM attached to res	servoir and oxygen
so long as fi	rst ventilation is de	elivered within 30 seconds.]	1
NOTE: The examiner must i	now inform the candi	idate that ventilation is being properly perform	ed without difficulty.
Re-checks pulse for at le	ast 5 but no more t	than 10 seconds	1
Attaches the BVM assem	1		
Ventilates the patient ac			•
-Proper volume to ma	1		
-Proper rate [10 – 12/	1		

"How would you know if you are delivering appropriate volumes with each ventilation?"

After suctioning the patient, failure to initiate ventilations within 30 seconds or interrupts ventilations for greater than 30 seconds at any time Failure to take or verbalize body substance isolation precautions Failure to suction airway before ventilating the patient Suctions the patient for an excessive and prolonged time Failure to check responsiveness and breathing for at least 5 seconds but no more than 10 seconds Failure to check pulse for at least 5 seconds but no more than 10 seconds Failure to voice and ultimately provide high oxygen concentration [at least 85%] Failure to ventilate the patient at a rate of at least 10/minute and no more than 12/minute Failure to provide adequate volumes per breath [maximum 2 errors/minute permissible] Insertion or use of any adjunct in a manner dangerous to the patient Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention You must factually document your rationale for checking any of the above critical items on this form in the space below CANDIDATE NAME: COMMENTS:	Critical Criteria	
Failure to take or verbalize body substance isolation precautions Failure to suction airway before ventilating the patient Suctions the patient for an excessive and prolonged time Failure to check responsiveness and breathing for at least 5 seconds but no more than 10 seconds Failure to check pulse for at least 5 seconds but no more than 10 seconds Failure to voice and ultimately provide high oxygen concentration [at least 85%] Failure to ventilate the patient at a rate of at least 10/minute and no more than 12/minute Failure to provide adequate volumes per breath [maximum 2 errors/minute permissible] Insertion or use of any adjunct in a manner dangerous to the patient Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention		initiate ventilations within 30 seconds or interrupts ventilations for greater than 30
Failure to suction airway before ventilating the patient Suctions the patient for an excessive and prolonged time Failure to check responsiveness and breathing for at least 5 seconds but no more than 10 seconds Failure to check pulse for at least 5 seconds but no more than 10 seconds Failure to voice and ultimately provide high oxygen concentration [at least 85%] Failure to ventilate the patient at a rate of at least 10/minute and no more than 12/minute Failure to provide adequate volumes per breath [maximum 2 errors/minute permissible] Insertion or use of any adjunct in a manner dangerous to the patient Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention		ubstance isolation precautions
Suctions the patient for an excessive and prolonged time Failure to check responsiveness and breathing for at least 5 seconds but no more than 10 seconds Failure to check pulse for at least 5 seconds but no more than 10 seconds Failure to voice and ultimately provide high oxygen concentration [at least 85%] Failure to ventilate the patient at a rate of at least 10/minute and no more than 12/minute Failure to provide adequate volumes per breath [maximum 2 errors/minute permissible] Insertion or use of any adjunct in a manner dangerous to the patient Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention		•
Failure to check responsiveness and breathing for at least 5 seconds but no more than 10 seconds Failure to check pulse for at least 5 seconds but no more than 10 seconds Failure to voice and ultimately provide high oxygen concentration [at least 85%] Failure to ventilate the patient at a rate of at least 10/minute and no more than 12/minute Failure to provide adequate volumes per breath [maximum 2 errors/minute permissible] Insertion or use of any adjunct in a manner dangerous to the patient Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention		- ,
Failure to check pulse for at least 5 seconds but no more than 10 seconds Failure to voice and ultimately provide high oxygen concentration [at least 85%] Failure to ventilate the patient at a rate of at least 10/minute and no more than 12/minute Failure to provide adequate volumes per breath [maximum 2 errors/minute permissible] Insertion or use of any adjunct in a manner dangerous to the patient Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention You must factually document your rationale for checking any of the above critical items on this form in the space below		, -
